The modified BIN is now written to the EEPROM, and the data will be verified (g) Read the EEPROM again and check the modified bytes to be sure everything is ok.. I'm sharing with you how to write VIN in your CIC and MEDIA using Tool32, but same process can be used to change the VIN# of any module , the only difference is the PRG file related to the module you want to access.

3. [change vin kombi](#)

Here, I will share the guide of how to replace the standard KOMBI in BMW F07/10/11 cars with a used extended 6WA Kombi.. Save the unmodified BIN and make a backup copy to a safe place Now erase the VIN (a) Replace (not insert !!!) byte 70 0F (1 pair) with "FF" (long VIN)(b) Replace all bytes from 80 00 to 80 0F (the whole line) with "FF" (long VIN)(c) Replace bytes 590 0E and 590 0F (2 pairs) with "FF" (short VIN)(d) Replace bytes 5A0 00 to 5A0 04 (5 pairs) with "FF" (short VIN)r270-esys-Kombi-Retrofit-9(e) Save the modified BIN (choose a new filename)(f) on the main screen, click on "WRITE".. The hardest and mistery part to get Internet/BMW live working is how to write the suitable VIN on the system.. DON'T DAMAGE THE CONNECTOR OR THE WIRES esys-Kombi-Retrofit-27Separate the secondary board from the main board, simply by squeezing the white securing tips and pulling the secondary board upwards.
